Simplify inventory management

Gain visibility and control of your inventory processes, from ordering and replenishment to issuing of stock. Optimise stock holdings, automate replenishment, manage multiple locations and maintain flexible catalogues for total inventory management.

Leverage procurement contracts

Use preferred supplier arrangements and automated approvals to optimise your purchasing spend. Ensure policy compliance by combining the Contract Management, Purchasing, Catalogues and Accounts Payable modules with approvals and workflow. Manage all aspects of your contracts and purchasing in one central place.

Consolidate supply chain information

Capture the complete details of all supply chain activity and associated financial transactions across the entire enterprise through embedded integration with TechnologyOne Financials, Asset Management, Work Orders, Contractors and Inventory. Track requisitions, purchases and receipts throughout the organisation without the need for paper-based or manual processes. Drill down to orders direct from the General Ledger, Accounts Payable and Fixed Asset modules.

Improve visibility of expenditure

Prevent budget overruns with an accurate and real-time view of committed and actual expenditure. Track costs to business units, assets, projects, suppliers and contracts.

Automate with eProcurement

Transmit orders via EDI, use web catalogues from suppliers, and receive and match supplier invoices to automate the entire procurement lifecycle. Reduce costs by exchanging data rather than paper with your suppliers.
